Title: Newnes Electrical Power
Engineer's Handbook, Second Edition

Author: Warne, D F

Publisher: Newnes

Publication Date: 2005-06-27

Number Of Pages: 480

* Cover

* Frontmatter

O *****S

- o Acknowledgements

- * Chapter 1. Introduction

- * Chapter 2. Principles of electrical engineering
 - o 2.1 Nomenclature and units

- o 2.2 Electromagnetic fields

- o 2.3 Circuits

- o 2.4 Energy and power

o References

* Chapter 3. Materials for electrical engineering

o 3.1 Introduction

o 3.2 Magnetic materials

o 3.3 Insulating materials

o 3.4 Conducting materials

o Acknowledgement

o References

* Chapter 4. Measurements and instrumentation o 4.1 Introduction

o 4.2 Pressure

o 4.3 Flow

o 4.4 Temperature

o 4.5 Position

o 4.6 Level

o 4.7 Weighing and force

o 4.8 Acceleration and speed

- o 4.9 Current

- o 4.10 HART and Fieldbus

- o 4.11 Data acquisition

- o 4.12 Installation notes

- * Chapter 5. Generators

- o 5.1 Introduction

- o 5.2 Main generator types

- o 5.3 Principles of operation

- o 5.4 The Automatic Voltage Regulator (AVR)
- o 5.5 Brushless excitation

- o 5.6 Construction

- o 5.7 Rating and specification

- o 5.8 Testing

- o 5.9 Standards

- * Chapter 6. Transformers

- o 6.1 Principles of operation

- o 6.2 Main features of construction

- o 6.3 Main classes of transformer
- o 6.4 Rating principles

- o 6.5 Test methods

- o 6.6 Commissioning, maintenance and

repair o 6.7 Standards

* Chapter 7. Switchgear

o 7.1 Introduction

o 7.2 Principles of operation

o 7.3 Low-voltage switchgear

o 7.4 Medium-voltage (distribution)
switchgear o 7.5 High-voltage
(transmission) switchgear o 7.6 DC
switchgear

- o References

- * Chapter 8. Fuses and protection relays

- o 8.1 Protection and co-ordination
 - o 8.2

- Fuses

- o 8.3 Protection relays

- o References

- * Chapter 9. Wires and cables

- o 9.1 Scope

- o 9.2 Principles of power cable design o

- 9.3 Main classes of cable

- o 9.4 Parameters and test methods o 9.5

- Optical communication cables o 9.6

- Standards

o References

* Chapter 10. Motors, motor control and drives o 10.1 Introduction

o 10.2 The direct current (DC) motor o

10.3 The cage induction motor o 10.4

The slipring induction motor o 10.5 The

ac synchronous motor o 10.6 The

brushless servomotor o 10.7 The

reluctance motor

o 10.8 The switched reluctance motor o

10.9 Mechanical and duty cycle

considerations o 10.10 Drive power

circuits

o 10.11 Effects of semiconductor power

converters o 10.12 The commercial

drive

- o 10.13 Standards

o References

* Chapter 11. Power electronic circuits and devices o 11.1 Introduction

o 11.2 Diode converters

o 11.3 Active devices

o 11.4 Principles of switching circuits o

11.5 High-frequency power supplies o

11.6 Standards

o References

* Chapter 12. Batteries and fuel cells o

12.1 Introduction

o 12.2 Primary cells

o 12.3 Secondary cells based upon
aqueous electrolytes o 12.4 Secondary
lithium ion cells o 12.5 Fuel cells

o 12.6 Battery charging

o 12.7 Battery monitoring

o 12.8 Installation, testing and
commissioning o 12.9 Operation and
maintenance o 12.10 Standards

- o References

- * Chapter 13. The power system

- o 13.1 Introduction

- o 13.2 Generation

- o 13.3 Transmission

- o 13.4 Distribution

- o 13.5 De-regulation and privatization o

- 13.6 Future trends

o References

* Chapter 14. Power quality and electromagnetic compatibility o 14.1

Power quality

o 14.2 Electromagnetic compatibility o

14.3 Standards

o References

* Chapter 15. Electricity and potentially explosive atmospheres o 15.1

Introduction

o 15.2 EU directives

o 15.3 UK legislation

o 15.4 Area classification

o 15.5 Hazardous area equipment o 15.6

Equipment selection

o 15.7 Equipment installation

o 15.8 Inspection and maintenance o

References

* Chapter 16. Principles of electrical safety o 16.1 Injuries from electricity o 16.2 Precautions against electric shock and contact burn injuries o 16.3 Precautions against arc and flashover burn injuries o 16.4 Precautions against fire o 16.5 Precautions against explosions o 16.6 Preventive maintenance and safe systems of work o 16.7 Standards

o References
